WHEREAS the University of Chicago hosts an extensive array of events, encompassing RSO activities, academic lectures, sports matches, community outreach programs, cultural celebrations, and interdisciplinary collaborations, that cater to a diverse audience that includes students, alumni, faculty, staff, and the general public, all of whom contribute to the vibrant campus life,

WHEREAS there is a pressing need for a centralized calendar to effectively display these events, streamlining the process of discovering and engaging with opportunities, and facilitating the convenience of the campus community, which in turn will enhance the connections within student life, empower members of the campus community to get involved in the University of Chicago's rich offerings, and foster an environment that supports the pursuit of academic, personal, and social growth,

BE IT RESOLVED the Undergraduate Student Government acknowledges the need for a comprehensive and user-friendly calendar system to bolster engagement across the campus community, encompassing RSOs, academic department events, open houses, showcases, performances, workshops, and numerous other opportunities that enrich the University of Chicago experience,

BE IT RESOLVED the Undergraduate Student Government will passionately advocate for the implementation of a centralized event calendar at the University of Chicago, with the aim of promoting a more inclusive, accessible, and well-connected campus environment that enables all

members of the community to discover, attend, and contribute to the vast array of events and activities that define the University's dynamic and multidimensional character,

BE IT RESOLVED the Undergraduate Student Government, having already developed the framework and front-end development of the calendar, will cooperate with the Senior IT Product Owner Specialist to take the finishing steps for the event calendar, such as establishing a login and review structure for submitted events.
